

ABOUT ME

I am a first year Artificial Intelligence master student who is always open to learn and explore new things. I enjoy programming and have written multiple usefuls code that are publicly available on my GitHub page. I am currently looking for a part-time job where I could use my programming skills.

Stephan Akkerman

Software Engineer

EDUCATION

Utrecht University, Utrecht | September 2021 - Present

MSc Artificial Intelligence

- ▷ Currently taking classes related to data mining and ethics in AI research.

Utrecht University, Utrecht | September 2018 - June 2021

BSc Artificial Intelligence

- ▷ Graduated with a GPA of 7.5
- ▷ Received an 8 for my thesis about trading cryptocurrencies using reinforcement learning.
- ▷ Followed the Agents track focused on programming related courses.
- ▷ Did a minor in computer science in my last year.

WORK EXPERIENCE

Studiekring, Apeldoorn | June 2018 - June 2021

Tutor

- ▷ Taught English, German, mathematics, economics, and business economics to high school students.

PROJECTS

<https://github.com/StephanAkkerman/TensorTrade>

TensorTrade

- ▷ This project was part of my bachelor thesis.
- ▷ It combines multiple sources of data to ensure that the reinforcement learning agent receives enough useful information.

https://github.com/StephanAkkerman/Live_Binance_Charts

Live Binance Charts

- ▷ It gets live data from the Binance exchange and converts it into candlesticks, so trading decision can be based upon that.
